- North-east (left) on You Bet Road 4.4 miles to Red Dog Road.
- Left on Red Dog Road ~1mile, to the left fork on the dirt road.
- ~2 miles to sharp right fork up the hill
- ~0.5 mi to gate on private property.
- ~0.5 mi approximately to operations location on claim.

Total parcel size: Approximately 18 acres.

Duration of operation: **Through December 31, 2013 (amended)**

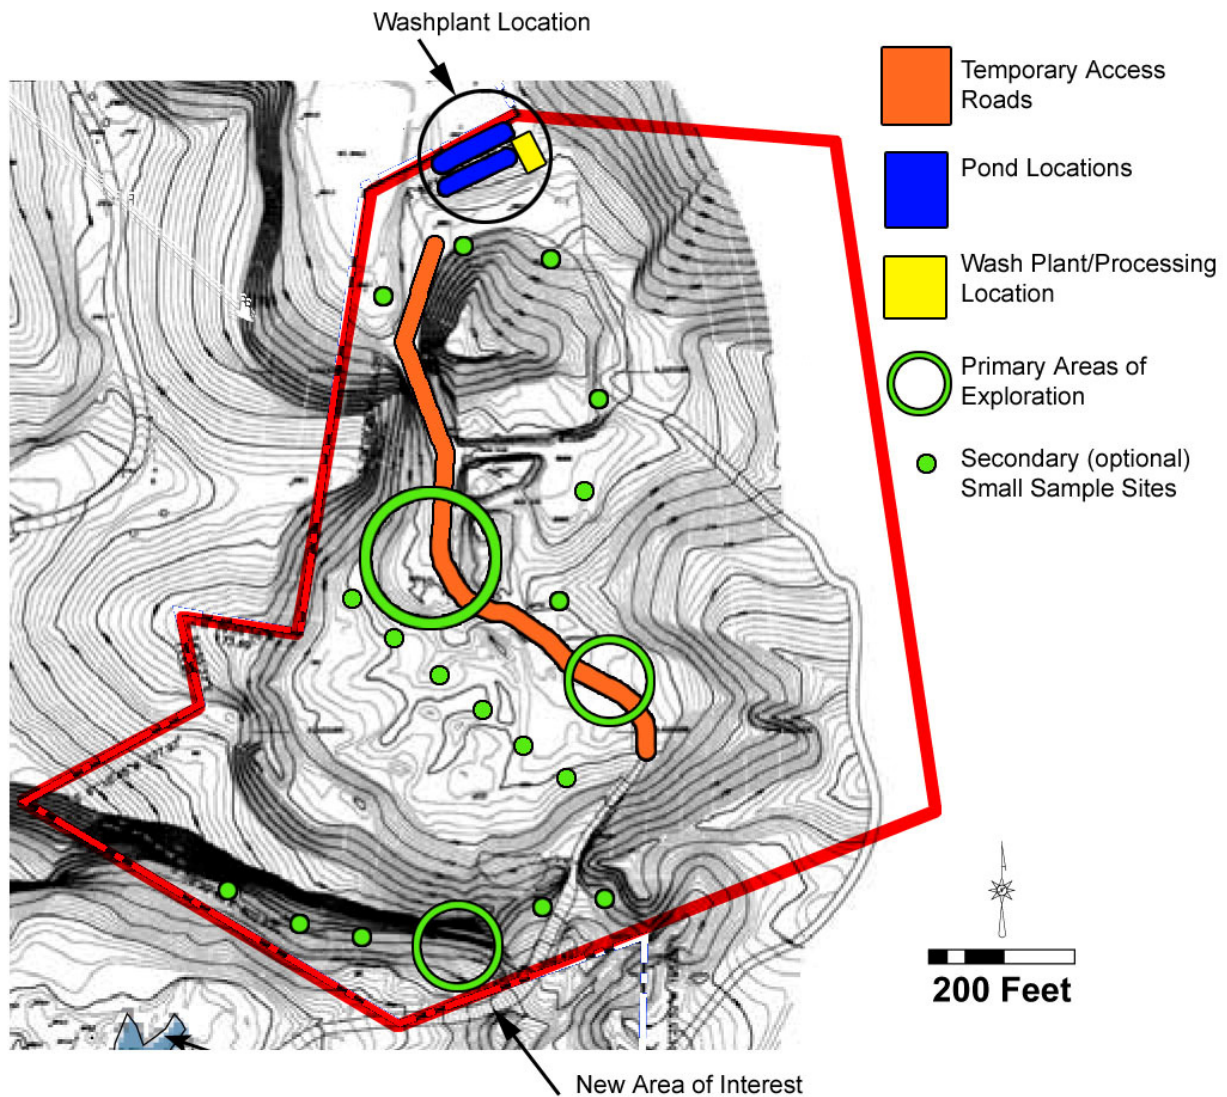

Total disturbance: <1000 cu. yds.

Total material to be processed: <1000 tons (<666 cu. yds.)

Amendment to: "Bunker Hill Phase I" Notice of Intent to Operate
Western Star Minerals and Exploration, April 14, 2013

Amended Activity Descriptions, Maps, and Schedule of Activities

A current map of activities is attached, showing updated exploration locations, site layout, and a new area of interest on the south end of the claim. The remainder of the original Notice of Intent to Operate remains intact.

Note: All location indicators are approximate representations of the activities being conducted.

The new area will consist of a bulk sampling pit and smaller samples sites to the east and west.

Reclamation: the new area of interest will be reclaimed immediately upon conclusion of sampling.

Cultural Inventory: If any historic artifacts are discovered near the new area of interest, they will be left undisturbed and will be reported to the BLM for further examination. To date only contorted pieces of hydraulic pipe have been seen on the neighboring property to the south. These remnants are believed to be from the last major hydraulic activities on the site ending in 1935.
